

Type of Policy:	REGION 5 EMRESOURCE POLICY GUIDELINE	Category:	EMERGENCY RESPONSE
-----------------	---	-----------	---------------------------

Title:	<i>Facility Identification within EMResource</i>	Policy #:	1
Page:	1 of 1	Replaces #:	
Issue Date:	4-7-23	Developed By:	CFDMC Staff
Revision Dates:		Approved By:	Region 5 EMResource Steering Committee

Hospital facilities should be listed in accordance with their state licensure. Separate identification for specialties, such as pediatrics, should only be done if the specialty is licensed separately. In the EMResource system, Hospital Facilities are a type of resources. Resource types are groups of resources that share a common characteristic and report a status. Resource types are used to categorize resources on views and in reports.
